ROLE OF NUTRIENT(S)	PRODUCT SPECIFICATIONS	FEATURES AND BENEFITS OF THE FORMULATION
Orgaform associates Nitrogen, Phosphorus and Potassium to Magnesium under perfectly assimilable forms. This mineral balance acts	Micro-granules fertilisation with organic nitrogen and slow-release nitrogen.	The specific formulation of this product guarantees a very strong assimilation of the nutrition elements by the soil solution guaranteeing a better availability
directly on the growth and the vegetative development.	Orgaform 13-9-4 is balanced NPK formulation, with focus on N requirement for use at early	for the roots.
	planting.	This product is formulated with rigorously selected raw materials, guaranteed by quality control, to ensure
	Orgaform 13-9-4 is designed to be applied during planting, in contact with the plant.	a perfect safety of use and to optimize the absorption through the soil.

Directions of use

CROP RECOMMENDATIONS

> MAIZE, SUNFLOWER - Rate: 30-40 kg/ha - Timing: placement application at sowing with microgranule applicator.

> CEREALS - Rate: 40-70 kg/ha - Timing: placement application at sowing with microgranule equipment or mixed with seeds (with conventional drills). When mixing with seeds, thoroughly mix the microgranules with the seeds. Sow about 3 to 4 hectares at most to avoid separation of the mix.

> FODDER BEET - Rate: 40 kg/ha - Timing: placement application at sowing with microgranule equipment or mixed with seeds (with conventional drills). When mixing with seeds, thoroughly mix the microgranules with the seeds. Sow about 3 to 4 hectares at most to avoid separation of the mix.

>PASTURES/LUCERNE/FESCUE/RYEGRASS - Rate: 40-80 kg/ha - Timing: placement application at sowing with microgranule equipment or mixed with seeds (with conventional drills). When mixing with seeds, thoroughly mix the microgranules with the seeds. Sow about 3 to 4 hectares at most to avoid separation of the mix.

> GRAPES

Rate: 12 g/ha per vine - Timing: at planting. Rate: 80-150 kg/ha - Timing: for established crops, placement application under the row.

Precautions

IMPORTANT: respect the uses, doses, conditions and instructions for use mentioned on the packaging, which are determined according to the characteristics of the product and the applications for which it is recommended. On this basis, conduct the crop and treatments according to the best agricultural practices taking into account, under your responsibility, all the specific factors concerning your farm, such as soil characteristics, weather conditions, cropping methods, cultivars and their specific resistances. AGRONUTRITION guarantees the quality its products only in their initial packaging over the period indicated on the manufacturer's certificates. They guarantee their conformity to the composition indicated on the packaging and to the regulations currently in force. Precautionary measure brochures are available on request. To request a MSDS, thank you to contact: fds-msds@agro-nutrition.fr

Instructions for use

Make sure equipment used is calibrated, apply the correct amount of product. Take atmospheric conditions into consideration, such as humdity etc affecting flow. Empty microgranule boxes after use.
